I think Professor Lesenyie's advice and examples on how to do the legislative papers were very helpful; he even made a Youtube video on how to research one of the assignments.

Sometimes Professor Lesenyie will stay on a slide too long and babble about the subject, and sometimes he will go over a slide too quickly.

What changes would you recommend to make this course a better learning experience? You might consider: the pacing of the course, the topics covered, the balance between lecture and discussion, the usefulness of assignments/readings.

I recommend more reading questions so that we know what to look for in the readings.

Were the course exams useful in helping you understand and think more deeply about the subject matter? Do you have any suggestions for improving them?

The course exams have been fine so far; it is a very basic format with short and long-answer questions. Almost every political science professor does this, so no change is needed.
